PyTimeline

At PyCamp 2023, a 3-day camp for python developers, I collaborated developing this board-game adaptation made with Django

Technology

Work Experience

Woxi - (2021 - now) FullStack Developer

During my time at Woxi, I gained valuable experience working with various frameworks. Initially, I worked extensively with AngularJS before transitioning to VueJS, which has been my go-to framework since then. My expertise with these frameworks allowed me to effectively develop and maintain complex web applications.

Moreover, I had the opportunity to expand my skill set by working with server-side tools like NodeJS and MongoDB, leading to a more complete understanding of the whole field.

Pentametrix - (2018 - 2021) Communications Specialist

At Pentametrix, I supported the business' marketing efforts by creating impactful online content, such as landing pages, product websites, and effective email automation. When Pentametrix merged with Welii in 2021, I seized the opportunity to join Welii's development team, where I continue to utilize my skills and expertise.

Welii/LamMovil - (2015 - 2021) Communications Specialist

At Pentametrix, I supported the business' marketing efforts by creating impactful online content, such as landing pages, product websites, and effective email automation. When Pentametrix merged with Welii in 2021, I seized the opportunity to join Welii's development team, where I continue to utilize my skills and expertise.

Education

Universidad Nacional de Córdoba (2012 - 2019)

Communication Sciences Bachelor's - Incomplete
